FINANCIAL PROFILE

No financial statements are available. Partnerships are not required to file their FS with the Philippine Securities and Exchange Commission, which is our main source of information.

CREDIT RISK: HIGH

RISK LEVEL	CREDIT RISK GUIDE
Low	Very good credit history.
Moderate	Basically good credit, but also suggests that the creditor/supplier should take a closer look at the subject-company to assess any particular credit risks before granting a high credit limit. Those falling within this range can have a chance of obtaining good credit terms, but may have to provide additional information for better evaluation.
High	Greater credit risk – but does not mean that the subject-company should not be given credit. It may only prevent the subject-company from getting the best credit terms.

CIBI Credit Risk Score indicates the company's credit strength derived by weighing multiple publicly available facts and qualitative and quantitative information – both positive and negative – and summing up all the weights. It is an opinion on a company's credit worthiness based on the current information available to CIBI at the time of evaluation. A score is good only for a limited period. The availability of financial information is critical in determining the appropriate risk score.

GENERAL CONSIDERATIONS FOR THE CREDIT RISK EVALUATION:

Financial Condition (45%)		Credit History (35%)	
Negative Records (10%)	Ownership Background (5%)	Years in Business (5%)	

In case of lack of financial data, more weight is given to Ownership Background and Bank and Trade Payment records in our analysis.
