HISTORY	
History	The company was incorporated in Guyana in 2021. It is the result of the Joint Venture of United States-based Lindsayca and CH4 group.
Key Developments	<p>“US-based group tapped by Guyana government to build Gas-to-Energy onshore facilities”</p> <p>By OilNOW November 10, 2022</p> <p>The US-based partnership CH4/Lindsayca has been given the green light from the Guyana government to construct the 300-megawatt (MW) combined cycle Power Plant and Natural Gas Liquids (NGL) Facility</p>

**BUSINESS CREDIT REPORT**

for its transformative Gas-to-Energy project. President Dr. Mohamed Irfaan Ali in a statement on Thursday said it was the number one ranked group of out of a list of nine pre-qualified bidders. Now, negotiations will start for the Engineering Procurement Construction (EPC) Contract. This should conclude by November's end. Power China fell in the second position and President Ali made it clear that should negotiations go sour with CH4/Lindsayca by the end of November, it would be engaged. The government has also selected Engineers India Limited to supervise the EPC. President Ali remarked that "...this is a significant movement forward in Guyana, not only achieving energy security, but in achieving an important benchmark that is a reduction in our energy costs so that our manufacturing and industrial development and expansion can take place and so that the ordinary families and the ordinary people can feel a substantial reduction in the cost of electricity in their pockets and in their households." "Just for reference, a family at the end of this project that now pays GY\$20,000 per month in light bill or electricity costs will see that cost coming down to GY\$10,000," he added. The 300 MW power plant and NGL plant will be owned by the government. An international firm will be competitively selected to operate the project. ExxonMobil is expected to deliver the completed pipeline to the power plant by the fourth quarter of 2024, to achieve commissioning and testing of the power plant by the end of 2024.

**BUSINESS CREDIT REPORT**

	<p>The Project is expected to deliver power at less than half of the current costs.</p> <p>-----</p> <p>“CH4/Lindsayca ranked number one to build gas to energy plant”</p> <p>-Guyana to be the owner, international firm will be operator</p> <p>President Irfaan Ali today announced that Cabinet had issued its no-objection to CH4/Lindsayca being ranked number one to build a 300 MW Combined Cycle Power Plant and Natural Gas Liquids (NGL) Plant at Wales, West Coast Demerara (WCD), under an Engineering Procurement Construction (EPC) Contract.</p> <p>In a statement, Ali said that Cabinet’s no-objection will now allow negotiations to proceed to conclude an EPC contract. Power China was ranked number two and may be engaged if negotiations fail to conclude a contract with Lindsayca by the end of November, he added.</p> <p>Earlier this year, he noted that nine firms were publicly pre-qualified to bid on the EPC contract. A Request for Proposals (RFP) was issued to these pre-qualified bidders. At the closing date of September 13th, five bids were received. These bids were evaluated for technical compliance and ranking by Stantec and Worley, two global engineering firms with expertise in oil and gas, the President said. Based on the reports of these international firms, an Evaluation team of three people, including a representative of Exxon, was appointed. He said that the Evaluation Team</p>

BUSINESS CREDIT REPORT

conducted the evaluation in accordance with the technical and economic criteria set out in the RFP. On the basis of the bids submitted and clarifications received, the Evaluation Team unanimously ranked CH4/Lindsayca as number one, and Power China as number two.

Ali said that contract negotiations will now start with the expectation that a deal will be executed before the end of November. Key considerations in the evaluation, he said, took account of the expected date of delivery of the 300 MW power plant by December 2024. Both top-ranked companies confirmed this deadline. The EPC Contract will be supervised by a global supervision firm, Engineers India Limited.

Ali said that contract negotiations will now start with the expectation that a deal will be executed before the end of November. Key considerations in the evaluation, he said, took account of the expected date of delivery of the 300 MW power plant by December 2024. Both top-ranked companies confirmed this deadline. The EPC Contract will be supervised by a global supervision firm, Engineers India Limited.

According to the President, the 300 MW power plant and NGL plant will be owned by the Government of Guyana. Prior to the conclusion of the construction, he said that an international firm will be competitively selected to operate the project to international standards and best practices. Exxon is expected to deliver the completed pipeline to the power plant by the fourth quarter of 2024, to achieve commissioning and testing of the 300 MW power plant by the end of 2024. He said that the Gas to

Atlantic Margin Island Partners Guyana Inc., Global Link Petroleum UAE, CDR International BV, Orinduik Marine Services Inc., General Engineering Supplies & Services Inc. Guyana Guyana's Vice President, Bharrat Jagdeo, has expressed dissatisfaction with ExxonMobil's pace in developing gas resources, though Exxon has said it is exploring the potential for gas development. Jagdeo has stated that if ExxonMobil is not interested in gas development, the discoveries should be relinquished to the government for development by other interested parties. More recently, ExxonMobil Upstream President Liam Mallon told OilNOW the company is aligned with the government on the issue. President of ExxonMobil Guyana, Alistair Routledge, told Reuters that gas production in the Stabroek block may be possible in 2029 or 2030. Exxon last said it estimates 17 trillion cubic feet of gas has been discovered in the Stabroek block.</p>

“LNDCH4 Guyana to hire 100+ contractors and employees locally”

By Editor - January 25, 2024

Lindsayca + CH4 (LNDCH4 Guyana) disclosed moments ago that it has hired 10 plus Guyanese contractors and employees and is in the process of conducting interviews to hire more personnel in the upcoming weeks. LNDCH4 is the company that was hired to construct a 300 MW Combined Cycle Power Plant and Natural Gas Liquids (NGL) Plant at Wales, West Coast Demerara (WCD) for the groundbreaking gas-to-energy project. That initiative is set to cost about US\$1.8B. It will strengthen Guyana’s energy capacity and also generate a multitude of employment opportunities to foster robust economic growth in the country.

The company said in a release that this milestone highlights its steadfast commitment to supporting the local workforce and fostering regional growth through meaningful employment opportunities.

As part of its ongoing expansion and sustainability initiatives, LNDCH4 – along with its subcontractors said it aims to hire 100 more employees in 2024.

“We are thrilled to have welcomed a diverse range of talented individuals into the LNDCH4 family. We are tapping into the wealth of expertise within our community and creating lasting partnerships that will benefit both the company and the country,” said Mr. Humberto Lopez, the General Manager of LNDCH4 Guyana.

He added that his company remains thankful to the local community for the overwhelming support and cooperation received throughout the hiring process.

**BUSINESS CREDIT REPORT**

“We remain committed to being a responsible corporate citizen and are excited about the prospects of working together,” the company official concluded.

“Gas-to-energy company announces open call for local service providers”

June 10, 2023 The US-based consortium Lindsayca/CH4 (LNDCH4), which is leading the way for Guyana’s Gas-to-Energy (GtE) project, has commenced the initial phase of its vendor and supplier identification in Guyana, extending a reach for suitable businesses to join in transforming the energy landscape.

Through the strategic implementation of “cutting-edge technology and unwavering commitment to environmentally conscious practices”, LNDCH4 said it aims to establish a new paradigm for energy production in Guyana while prioritising the utilisation of local resources.

Government had contracted CH4-Lindsayca to construct the integrated facility at Wales, West Bank Demerara, to the tune of US\$759 million.

“This ground-breaking gas-to-energy project holds the potential to not only strengthen Guyana’s energy capacity but also generate a multitude of employment opportunities and foster robust economic growth in the region. LNDCH4 welcomes businesses specialising in various sectors to participate in this momentous venture.”

The consortium said it is particularly interested in collaborating with enterprises that excel in the fields of manufacturing, production, dealers, distributors, maintenance, repair, rental, lease, construction

BUSINESS CREDIT REPORT

	<p>contractors, professional services, and logistics providers.</p> <p>“Your invaluable expertise in these areas will be instrumental in ensuring the successful realisation of our transformative goals. Together, we can pave the way for a sustainable and prosperous future within the energy industry.”</p> <p>Contribution of Guyanese</p> <p>General Manager of LNDCH4 Guyana, Humberto Lopez said “We welcome the contribution of Guyanese to participate in this ground-breaking project. Together, we can forge a path towards a cleaner and more sustainable future – empowering people and communities.”</p> <p>To participate in the vendor identification process, interested parties were invited to register their interest by completing the online form available at www.bit.ly/LNDCH4GY. This form will allow potential suppliers and service providers to provide essential information about their organisation, products, or services, enabling LNDCH4 to evaluate their suitability for partnership opportunities.</p> <p>Last November, the Guyana Government awarded the team of Lindsayca and CH4 Systems, a contract to give EEGPL the tools to “continue guaranteeing a reliable power supply into the future and will bring about substantial energy savings for the country, reducing electricity costs significantly for families and commercial users alike, helping to foment sustainable economic growth”.</p> <p>As part of the Dr Irfaan Ali-led Administration’s energy policy, the multibillion-dollar model Gas-to-Shore Project received a whopping \$43.3 billion from Budget 2023.</p>
--	---

BUSINESS CREDIT REPORT

	<p>The scope of the Gas-to-Shore Project also consists of the construction of 225 kilometres of pipeline from the Liza field in the Stabroek Block offshore Guyana, where Exxon and its partners are currently producing oil.</p> <p>It features approximately 200 kilometres of a subsea pipeline offshore that will run from Liza Destiny and Liza Unity floating production, storage and offloading (FPSO) vessels in the Stabroek Block to the shore. Upon landing on the West Coast Demerara shore, the pipeline would continue for approximately 25 kilometres to the NGL plant at Wales, West Bank Demerara.</p> <p>The pipeline would be 12 inches wide, and is expected to transport per day some 50 million standard cubic feet (mscfd) of dry gas to the NGL plant, but it has the capacity to push as much as 120 mscfd.</p> <p>The pipeline's route onshore would follow the same path as the fibre optic cables, and terminate at Hermitage. BY INEWS GUYANA</p>
